

Affichage graphique de la temperature du DHT11

On part de notre Noeud MQTT in precedent :

Avec bien sur le serveur MQTT ⇒ fablab37110.ddns.net:1883

Le bon Topic : tele/tasmota_XXXXXX/SENSOR (XXXXXX etant le numero de votre ESP32 dans tasmota)

The screenshot shows the 'Edit mqtt in node' configuration window. At the top, there are 'Delete', 'Cancel', and 'Done' buttons. Below is a 'Properties' section with several fields: 'Server' is set to 'fablab37110.ddns.net:1883'; 'Action' is 'Subscribe to single topic'; 'Topic' is 'tele/tasmota_6B2128/SENSOR'; 'QoS' is '2'; 'Output' is 'auto-detect (parsed JSON object, string or buffe)'; and 'Name' is 'Name'. There are also icons for settings, a document, and a refresh button.
