

# Notifications sur telephone via l'application ntfy ( open source )

## Installation

### sur telephone

Installer l'application ntfy via Play Store

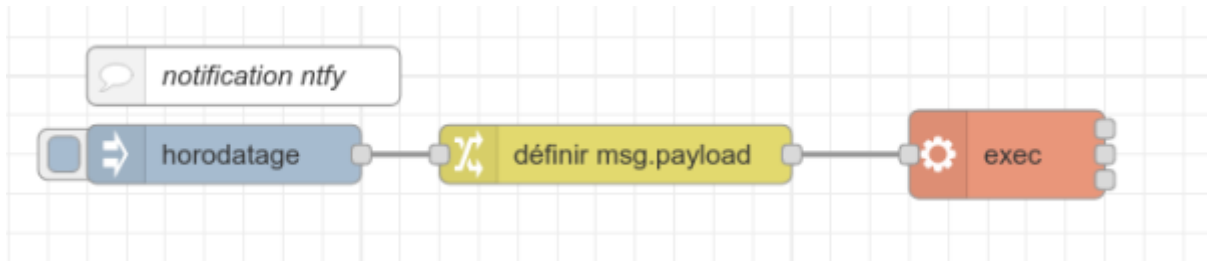

S'abonner au sujet :

exemple : fablab\_alarme\_intrusion

Et bien sur autoriser et regler votre sonnerie des notifications

## Sur node-red

pour le test installer 3 noeuds :

1. -Inject :Horodatage
2. -Change
3. -Exec

-1- Le noeud Horodatage

msg.payload = Horodatage

The screenshot shows the 'Modifier le noeud inject' configuration window in Node-RED. At the top, there are buttons for 'Supprimer', 'Annuler', and 'Terminer'. Below is a 'Propriétés' section with a search icon and a 'Nom' field. The main configuration area contains two rows: 'msg.payload' set to 'horodatage' and 'msg.topic' set to '1\_2'. At the bottom, there are options for '+ Ajouter', 'Injecter maintenant', a checkbox for 'Injecter une fois après 0,1 secondes, puis', and a 'Répéter' dropdown set to 'non'. The window is currently set to 'Activé'.

## -2- Le noeud Change
